work The dreamer's journey

Inspiration.

This is a story about a man who perseveres, overcomes obstacles, stays optimistic, and finally sees a beautiful view. It was inspired by my skiing experience during my vacation. At the beginning I didn't know how to ski at all, but I slowly became more skillful, and finally I found it very interesting, and the snow on the mountain was very beautiful.

Production process

This is a simple story, I use three css files to link them into a complete work with three parts, which works with some dynamic effects, such as the sun's rise, and the effect of snow. I did a lot of research for this.

Learning outcomes

I learned how to add text, how to create dynamic effects and how to link. I wasn't very familiar with using the code before, but after learning it I became proficient.
